	However, these assumptions may change if there are any changes in the assets
	under management.
Operating revenues	· It is calculated based on lease agreements currently in effect and taking into
	consideration portfolio property competitiveness, market conditions and other
	factors. Also, with regard to other factors such as items that might change

	in the fiscal year of acquisition are calculated on a pro rata basis as of the date of
	acquisition and shared between the buyer and seller. Hankyu REIT, however,
	capitalizes the amount of these taxes into the acquisition cost.
	An estimate for repairs and maintenance expenses of buildings for each fiscal
	period is allocated to expenses during the relevant fiscal period. The actual
	repairs and maintenance expenses may, however, differ significantly from the
	amount estimated, as a substantial amount of unexpected contingent repairs and
	maintenance expenses may be required, and these expenses differ significantly
	between fiscal periods, and are not incurred on a regular basis.
	Property/facility management fees are estimated to be 333 million yen.
	Depreciation costs are calculated using the straight line method and are actimated to be 072 million year

are estimated to be 9 million yen.
 Interest expenses and finance related costs are estimated to be 407 million yen.

It is assumed the additional issuance of investment units by way of third-party allotment, ceiling of 1,300 units, will all be issued. Is it assumed that there will be no issuance of new investment units other than that until November 30, 2014.
